

Creating a Detailed Estimate Sheet

AEC APPLICATIONS

February 7, 2014

1. Create a new file using the following seed file, Use the following seed file, W:\Workspace\Standards\seed\CT_Sheet_Arch_2D_V8.dgn
2. On the CT DOT Sheet Composition Task select **Common Borders**. Place the Detailed Estimate Grid work. On the Common Borders Task Bar choose the desired Estimate sheet grid. Tentative to the lower left hand corner of the transient shape and accept.

3. Attach the Estimating Item Cell Library. Use a scale of 1.0 to have the cells come in the correct size.
W:\Workspace\Standards\cell\cell2\HW_Detail_Est_Items.cel
